

RAZA ZAHEER

Karachi, Pakistan | +92 312 0102177 | razazaheer2002@gmail.com | [GitHub](#) · [LinkedIn](#) · [Portfolio](#)

PROFILE SUMMARY

Front-End Developer with 2+ years of experience in React.js, Next.js, and JavaScript (ES6+), expanding into full-stack and AI-driven applications. Experienced in architecting end-to-end production systems including real-time analytics platforms, WebSocket applications, and RAG chatbots. Skilled in state management, RESTful APIs, and component-driven architecture.

EDUCATION

Iqra University

Bachelor of Science in Computer Science

Feb 2021 – Jan 2025

Karachi, Pakistan

EXPERIENCE

Frontend Development Intern

CodeAlpha

Dec 2025 – Jan 2026

Remote

- Developed responsive web applications and collaborated with a cross-functional team using Git/GitHub for code reviews and agile sprints.

Front-End Web Developer (Freelance)

Self Employed

Jan 2023 – Present

Karachi, Pakistan (Remote)

- Delivered **10+ client projects** with React.js, Next.js & REST API integration, improving engagement by **35%** via responsive, mobile-first design
- Maintained **100% on-time delivery** using Git/GitHub for version control and collaboration

PROJECTS

Real-Time Analytics Dashboard | Next.js, NestJS, TypeScript, Prisma, Socket.io, Supabase (PostgreSQL)

- Architected a full-stack, role-based analytics platform (**ADMIN/ANALYST/VIEWER**) with **JWT authentication** and backend-enforced **RBAC guards**, restricting sensitive routes and data across both REST and WebSocket layers for every incoming request
- Built a **NestJS + Socket.io** real-time engine streaming live metrics into **Recharts** visualizations with dynamic date/category/region filtering (**Zustand**), plus Admin-only CSV/PDF export and full user-management CRUD — [GitHub](#)

PDF RAG Chatbot | NestJS, Next.js, TypeScript, Pinecone, LangChain, OpenRouter AI

- Built a full-stack AI chatbot powered by a complete **RAG pipeline**: uploaded PDFs are chunked, embedded, and stored in **Pinecone Vector DB** for context-aware retrieval, with dynamic switching between multiple free LLM models
- Engineered a modular **NestJS REST API** with **LangChain** orchestration, out-of-scope query detection, and real-time **SSE streaming** to a responsive **Next.js** frontend — [GitHub](#)

Real-Time Chat Application | React.js, Node.js, Express, MongoDB, Socket.io, Cloudinary

- Architected a full-stack **MERN chat platform** with **JWT auth**, multi-room channels, private DMs, image sharing, unread badges, live online/offline presence, typing indicators, sound alerts, browser notifications, and **Cloudinary** uploads — all synced via **Socket.io** with zero page reloads
- Deployed split architecture (**Vercel + Dockerized Node.js** on Hugging Face), resolving cross-origin JWT, WebSocket race conditions, and CORS issues — [GitHub](#) | [Live Demo](#)

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Next.js, Tailwind CSS, Responsive Design

Backend & DB: Node.js, Express.js, NestJS, RESTful API Design, MongoDB, SQL, JWT Authentication

Real-Time & AI: Socket.io, RAG Pipelines, LangChain, Vector Databases (Pinecone), LLM Integration

Tools: Git, GitHub, VS Code, Docker, Vercel, Netlify, Postman
